Report from Cape Colony—Plague—Examination for plague-infected rodents—Infectious diseases.

COLONIAL SECRETARY'S OFFICE,
Cape Town, Cape of Good Hope, March 20, 1905.

The following report by the medical officer of health for the Colony on the occurrence of bubonic plague in the Cape Colony for the week ended March 18, 1905, is published for general information.

NOEL JANISCH,
Under Colonial Secretary.

Port Elizabeth.—One case of plague was discovered during the week, namely: A native female on the 17th instant. At the plague hospital 1 case remains under treatment. Two hundred and fourteen rats (16 found dead) and 237 mice (17 found dead) were bacteriologically examined during the week, of which 4 rats and 9 mice proved to be plague-infected.

East London.—Two cases of plague were discovered during the week, namely: Two Indian males on the 13th instant. At the plague hospital 2 Indian males died. One native female remains under treatment. Eighty-nine rats (45 found dead) and 36 mice (9 found dead), were bacteriologically examined during the week, of which 25 rats and 1 mouse proved to be plague-infected.

Other districts of the Colony.—No plague infection was discovered either in man or animals. Three hundred and twenty-nine rodents were examined during the week from the Cape Town harbor board area and the shipping in the harbor, and 577 were examined by the medical officer of health for the city from the Cape Town municipal area.

A. JOHN GREGORY,
Medical Officer of Health for the Colony.

Return of cases of infectious disease in the Cape division for the week ended March 18, 1905.

Reports from Brisbane—Plague bulletins—Plague in Queensland and New South Wales.

Consul-General Bray, at Melbourne, forwards the following:

DEPARTMENT OF PUBLIC HEALTH, QUEENSLAND,
Brisbane, February 25, 1905.

Plague bulletin No. 8, for week ended 12 o'clock noon, Saturday, February 25, 1905:

PLAGUE IN MAN.

The following 3 cases of plague occurred in Brisbane during the above-mentioned period:

February 18.—A married woman, aged 49 years, residing at Kangaroo Point, where she carried on business as a storekeeper. This case occurred five doors from the fatal case of plague reported in bulletin No. 5.

February 18.—A schoolboy, aged 12 years, residing with his parents at Taringa, 4 miles from Brisbane. The boy's father, a storekeeper, reports the finding of dead rats on his premises.

February 24.—A man, aged 30 years, a resident of Paddington, employed as a checker in the Railway Goods Shed, Roma street, Brisbane. This patient was reported as a suspicious case of plague on the morning of the 24th instant, and died late on the afternoon of the same day. Inquiry in connection with this case is proceeding.

SUMMARY.

Number of cases declared to date.....	18
Cases declared during week.....	4
Cases discharged.....	0
Remaining under treatment.....	11
Deaths during the week.....	3
Last case, February 24, 1905.

B. BURNETT HAM.
Commissioner of Public Health.

BRISBANE, March 4, 1905.

Plague Bulletin, No. 9, for week ended 12 o'clock noon Saturday, March 4, 1905.

PLAGUE IN MAN.

Only 1 case of plague occurred in Brisbane during the above-mentioned period.

February 28.—A man 25 years of age, a resident of Fortitude Valley, employed as a saw sharpener in a sawmill situated at Bulimba, died on the 2d instant.

In this case, and also in the fatal case reported on February 24 (Bulletin No. 8), there was delay in summoning medical aid. In both cases the specific bacilli of plague were present in the peripheral blood some hours before the patients died and prior to their admission into the plague hospital.

SUMMARY.

Number of cases declared to date	20
Cases declared during week	1
Cases discharged	2
Remaining under treatment	8
Deaths during the week	1

Last case February 28, 1905.

BRISBANE, *March 11, 1905.*

Plague Bulletin No. 10, for week ended 12 o'clock noon, Saturday, March 11, 1905.

PLAGUE IN MAN.

Two cases of plague occurred in Brisbane during the above-mentioned period:

March 6.—A Chinese fruit hawker, aged 32 years, who resided and carried on business in Ann street, Fortitude Valley, died on the 7th instant. No evidence of rats on premises.

March 9.—A boy, aged 19 years, residing at Montague road, South Brisbane, where also he was employed looking after cows.

A plague-infected rat was found at a residence, Montague road, on March 1.

SUMMARY.

Number of cases declared to date	22
Cases declared during week	2
Cases discharged	2
Remaining under treatment	7
Deaths during week	1

Last case March 9, 1905.

PLAGUE IN RATS.

Rats examined during week from Ulmarra, 105; North Grafton, 35; South Grafton, 3; Southgate, 5; Harwood Island, 3; total, 151; infected, none.

By order.

G. H. KING, *Secretary.*

N. B.—The Clarence and Richmond River areas will be declared free from infection at the board meeting to be held on March 14, 1905. No further bulletins will be issued from this date.

Northern Rivers district declared free from infection.

VICTORIA, *March 23, 1905.*

Premier New South Wales reports that all plague patients have been discharged from hospital in Northern Rivers district, and district declared free from infection.

G. H. REID.

AMERICAN CONSUL-GENERAL, *Melbourne.*

AUSTRIA-HUNGARY.

Report from Budapest—Epidemic meningitis in Galicia.

The following is received from the Bureau of Immigration, under date of April 19, 1905:

Military authorities ordered stop granting leave absence into Galicia account epidemic meningitis from there. Thousands about to emigrate to America.

BRAZIL.

Report from Rio de Janeiro—Inspection of vessels—Plague in Argentina and Chile—Mortuary statistics: Plague, smallpox, and yellow fever.

Acting Assistant-Surgeon Stewart reports, March 28, as follows:

During the week ended the 25th instant, there was only 1 vessel leaving this port for United States ports, namely, the British steamship *Sailor Prince*, for New York, with a cargo of coffee, no passengers of any class from here, and 1 new member of the crew signed on here to replace 1 man sent to hospital with rheumatism. This ship was of course inspected, and a bill of health issued.

Bubonic plague in Argentina.

A dispatch of the 23d instant states that a physician of the city of Buenos Ayres has denounced the report by the sanitary authorities that a case of plague had occurred in the suburbs of that city. A dispatch of the following day from Buenos Ayres reports that the press of that city place no importance in the reports of such a case having occurred. Another dispatch of the same date reports that on that day 1 man was taken ill with suspicious symptoms, and was at once isolated, and placed under rigorous observation.

The journal *los Principios* of Cordoba, states that in Leones, in the province of Cordoba, there are 12 cases of bubonic plague, and that other cases occurred there, some of them fatal, before these cases, but were not reported.

A dispatch of the 26th instant states that the press is urging the establishment of a sanitary service in Cordilheira, in the Andes, in order to prevent the introduction of bubonic plague from Chile into Argentina.

Bubonic plague in Chile.

A dispatch of the 23d instant states that there have been no further cases of plague in Valparaiso. On the following day it was reported that the disease was declining in the northern parts of Chile, and that it had completely disappeared from Valparaiso.

One dispatch of the 26th instant states that the Government, aroused from inaction by the appearance of some cases in Santiago, the capital, has ordered the disinfection, daily, of all the churches of that city.

On the 25th instant it was reported that there were 103 cases of bubonic plague under treatment in Pisagua. The same dispatch says that an examination of the blood in the case of the patient who died

from suspected plague in Valparaiso revealed the presence of the bacillus of Yersin.

On the 27th instant 4 cases of bubonic plague were verified and reported in Iquique and cases were also discovered and verified in Chañaral.

The infection of these cities in Chile has apparently been very rapid, as according to reports received from there 2 months ago there were no cases of this disease in Chile. Now so many places are infected that it is probable that there will be an outbreak of some magnitude. It may, however, be simply a case of recrudescence as the disease has been more or less endemic on the west coast for some years, appearing from time to time in epidemics of more or less severity. It is now, however, very widely distributed, although there is no large number of cases at any one place with the exception of Pisagua.

Mortality in Pernambuco.

During the second fortnight of February there were in Pernambuco 332 deaths. Of this number 153 deaths were due to variola, 1 to enteric fever, 1 to measles, 35 to pulmonary tuberculosis, 15 to malarial fevers, 5 to syphilis, 1 to cancer, 3 to grippe, 2 to dysentery, 3 to septicemia, 1 to beriberi, 6 to erysipelas, 1 to alcoholism; to ankylostomiasis, 3; diseases of the nervous system, 28; of the circulatory system, 14; of the respiratory system, 4; of the digestive system, 17; of the genito-urinary system, 7; of the skin, 1; of young children, 6; and other causes 6.

By ages: Stillbirths, 19; 1 to 30 days, 11; 1 to 12 months, 22; 1 to 5 years, 34; 6 to 10 years, 17; 11 to 20 years, 44; 21 to 30 years, 67; 31 to 40 years, 35; 41 to 50 years, 34; 51 to 60 years, 19; 61 to 70 years, 13; 71 to 80 years, 6; 81 to 90 years, 6; 91 to 100 years, 1; and age unknown, 18.

The daily rate of mortality was 38 for the maximum, 17 for the minimum, and 25.9 for the average.

The rate per each 1,000 of the estimated population (180,000 to 200,000), is 49.7.

Mortality in Rio de Janeiro for the week ended March 26, 1905.

During the week ended the 26th instant, there were in all 268 deaths. Of this number 3 were caused by yellow fever, with 14 new cases, the largest number reported for 18 months; i. e., in any one week. At the close of the week there were 7 cases in Sao Sebastiao hospital. Two of the deaths occurred in the city and 1 in hospital. Plague caused only 1 death, with 1 new case, and at the end of the week there were 8 cases under treatment at the plague hospital. Variola caused 5 deaths, with 4 new cases, leaving 27 cases under treatment at the hospital.

The epidemics of bubonic plague and variola may, therefore, be considered as ended for the time being. The infection, however, I believe remains in the city, and a recrudescence may at any time be looked for.

The other causes of deaths were: Measles, 1; grippe, 21; enteric fever, 1; dysentery, 1; beriberi, 1; leprosy, 1; erysipelas, 1; malarial fevers, 6; tuberculosis, pulmonary variety, 49; other forms of tuber-

culosis, 4; septicæmia, 2; cancer, 4; other general diseases, 2; diseases of the nervous system, 31; of the circulatory system, 37; of the respiratory system, 26; of the digestive system, 33; of the urinary system, 9; puerperal septicæmia, 2; accidents during puerperal state, 2; disease of the skin, 3; congenital debility, 9; senile debility, 7; violence, except suicide, 6.

By ages: Less than 1 year, 55; 1 to 5 years, 26; 5 to 10 years, 8; 10 to 20 years, 12; 20 to 30 years, 34; 30 to 40 years, 33; 40 to 50 years, 26; 50 to 60 years, 27; more than 60 years of age, 46, and age unknown, 1. Natives, 211; foreigners, 55; nationality unknown, 2.

By localities: In houses, etc., 176; in civil hospitals, 30; in military hospitals, 4; in Santa Casa da Misericordia, 51; in asylums, convents, etc., 2; in unknown localities, 5.

The daily average number of deaths was 38.28, compared with 38 for the preceding week, and with 43.28 for the corresponding week of 1904. The coefficient per each 1,000 of the estimated population (905,000) is 15.43.

The highest range of the thermometer was 29.3° C. and the lowest 20.3° C., with a mean for the week of 23.88° C. The total rainfall was 65.60 mm.

BRITISH HONDURAS.

Report from Belize, fruit port.

Acting Assistant Surgeon Carson reports as follows: Week ended April 13, 1905. Present officially estimated population, 8,500; number of deaths, 9; prevailing diseases, malarial fever and varicella; general sanitary condition of this port and the surrounding country during the week, fairly good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 7	Olympia.....	41	6	37	0
8	Belize	17	1	5	0

Number of aliens inspected, 5.

CANADA.

Report from Victoria, British Columbia—Inspection of immigrants.

Assistant Surgeon Glover reports as follows: Month of March, 1905. Number of immigrants inspected, 94; number passed, 90; number rejected, 4; number certified on account of dangerous contagious diseases, 1.

CHILE.

Report from Santiago—Epidemic plague at Pisagua—Plague conditions in Chilean and Peruvian coast towns.

The following is received from the American legation at Santiago de Chile, through the Department of State, under date of March 15, 1905:

The present sanitary condition of the coast of Chile is, in general,

very serious. Bubonic plague, which is generally admitted to have existed sporadically for months in various cities and towns in northern Chile, broke out some weeks ago in epidemic form in Pisagua and has practically depopulated that town, such of the inhabitants as were not victims leaving for fear of being attacked. Pisagua has direct train connection with Iquique.

During the last few days plague has been declared to exist at Molendo, in Peru, and at Copiapo, in Chile, though its existence in Copiapo was almost immediately denied. This morning it was declared to have broken out at Chañaral. The American vice-consul at Iquique, to whom I telegraphed regarding the sanitary conditions there, has just replied that there is good reason to believe that the suspected cases there are actually plague.

All along the coast smallpox is also uncommonly prevalent. In Valparaiso an unusual number of cases exist and many deaths have occurred.

CHINA.

Report from Shanghai—Mortality from communicable diseases—Smallpox—Cholera in Tientsin.

Acting Assistant Surgeon Ransom reports, March 16, as follows:

During the week ended March 11, 1905, no bills of health were issued at this station. There were, however, disinfected the effects of 12 Asiatics intending to ship as part of the crew of the steamship *Foreric*, bound to Tacoma.

The report of the municipal health officer shows for the period named among foreigners, smallpox 2 new cases, enteric fever and diphtheria each 1 new case; among natives, smallpox 3 deaths, diphtheria 6 deaths, and tuberculosis 34 deaths. The total reported mortality was 6 foreigners and 154 natives.

There have been reported from Tientsin 3 cases of smallpox with 1 death, but a later report states that the diagnosis was incorrect. There was also reported from the same port 1 case and 1 death from cholera.

COSTA RICA.

Report from Limon, fruit port—Completion of new hospital.^a

Acting Assistant Surgeon Goodman reports as follows: Week ended April 15, 1905. Estimated population, 4,000; number of deaths, 9; prevailing diseases, malarial fever and tuberculosis.

General sanitary condition of this port and the surrounding country during the week, good.

In addition to the sanitary improvements noted in last week's report, I have to mention the completion of the new hospital, one-half mile north of the town and beautifully situated on the seashore. It is to take the place of the three smaller hospitals formerly in the heart of the town, though so far the patients of only one of these buildings have been transferred.

^a In Public Health Reports for week ended April 21, page 716, "increased morbidity and mortality" should be "decreased morbidity and mortality."

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 7	Cataluña	116	46	64	0
9	España	42	0	3	0
10	Alleghany	49	21	9	0
12	Alps	25	0	0	0
12	Katie	23	0	1	0
13	Venus	32	0	0	0
14	Chickahominy	48	2	0	0
15	Brewster	33	0	0	0

Two bills of health for Panaman ports were viséed.

CUBA.

Report from Cienfuegos—Inspection of vessels—Water supply not good.

Acting Assistant Surgeon McMahon reports, April 18, as follows: During the week ended April 15, 1905, 6 vessels were inspected, with a total crew of 211 and 15 passengers (2 aliens), and bills of health issued for ports in the United States. All of the vessels were in good sanitary condition; no sickness on board.

No quarantinable disease arrived at this port during this week and none were reported in the city.

Heavy rains have fallen here lately, and consequently the water supply from the aqueduct is very bad on account of the surface drainage into the river from which the water is obtained.

Report from Habana—Inspection of vessels—Mortuary statistics.

Surgeon Wertenbaker reports, April 17, as follows:

Week ended April 15, 1905.

Vessels inspected and bills of health issued	22
Crew of outgoing vessels inspected	1,018
Passengers of outgoing vessels inspected	686
Pieces of freight passed (salted hides)	823

One passenger from French steamship *Champagne* was sent to Las Animas Hospital with elevated temperature, April 14, 1905.

No quarantinable diseases have been reported in the city or island during the week.

Mortality in Habana during the ten days ended April 10, 1905.

Disease.	Number of deaths.
Broncho-pneumonia	2
Cancer	8
Diphtheria	1
Enteric fever	3
Enteritis	13
Measles	4
Scarlet fever	2
Tuberculosis	32

Total deaths from all causes, 149.

Report from Matanzas—Inspection of vessels—Scarlet fever and measles—Mortuary statistics.

Acting Assistant Surgeon Nuñez reports, April 17, as follows:

During the week ended April 15, 1905, bills of health were granted to 6 vessels bound for United States ports in good sanitary condition.

The contagious diseases officially reported in the city during the week have been 1 case of scarlet fever and 27 cases of measles, with no deaths. This shows an increase of 7 cases of the latter disease over the preceding week.

Mortuary statistics of the city of Matanzas for the period from April 1 to 10, 1905.

Causes of death.	Number of deaths.	Bertillon number.
Meningitis	1	61
Tuberculosis, pulmonary	2	27
Athrepsia	2	165
Disease of the heart (unqualified)	2	79
Broncho-pneumonia	3	92
Bright's disease	1	120
Arterio-sclerosis	1	81
Enteritis, infantile	2	165a
Enteritis, tubercular	1	29
Occlusion, intestinal	1	108
Osteo-sarcoma	1	45
Total	17	

Annual rate of mortality per mille, 12.92; estimated population, 48,000.

No quarantinable disease has been reported.

Report from Nuevitas—Inspection of vessels.

Acting Assistant Surgeon McConnell reports, April 17, as follows:

During the week ended April 15, 1905, bills of health were issued to the Cuban steamer *Julio*, bound for Porto Rico (via Santiago) and Santo Domingo, 60 crew and 39 passengers inspected; and to the Spanish steamer *Ernesto*, bound for Pensacola, crew 32 inspected.

No quarantinable disease has been reported in this district.

Report from Santiago—Transactions of service, March, 1905.

Acting Assistant Surgeon Wilson reports, April 15, as follows:

Month of March, 1905.

Bills of health issued	24
Outgoing vessels inspected (included in the above)	15
Crews	1, 109
Passengers	495
Deaths from yellow fever	0
Deaths from other contagious diseases	0
Deaths from all causes (stillbirths not counted)	73
Cases of quarantinable diseases reported in city (suspicious of leprosy)	1
Cases of other contagious diseases reported in city (diphtheria)	1
Vaccination certificates issued for Canal Zone and Panama	0

GERMANY.

Report from Berlin—Death rate of Berlin and other cities.

Consul-General Mason reports, April 4, as follows:

The death rate of Berlin for the week ended March 18 was not much lower than that of the preceding week, amounting, calculated on the

year, to 16.1 per thousand of the population, thus being higher than the rate for the same week of last year, in which it amounted only to 14.2 per thousand. Of the large German towns and cities, two-thirds showed less favorable health conditions than Berlin. The following places had a considerably higher rate of mortality than Berlin, namely: Hamburg, Bremen, Magdeburg, Leipzig, Dresden, Nuremberg, Munich, Stuttgart, Aix la Chapelle, Breslau, Königsberg, and Rixdorf (with 20.7), as well as Paris and Vienna. The following cities, on the other hand, had a lower death rate than Berlin, viz: Halle, Hanover, Brunswick, Frankfort-on-the-Main, Cassel, Charlottenburg (with 13 per thousand), Schöneberg (with 9.1), also London. The infant mortality rate, amounting to 3.7 per year and thousand, was lower than the Hamburg, Munich, and Leipzig rate. There were registered: 128 deaths from phthisis pulmonalis, 103 deaths from acute diseases of the respiratory organs (including 8 from influenza), 40 deaths from cancer, 7 deaths from diphtheria, 6 deaths from measles, and 5 deaths from scarlet fever. Finally, 12 persons died by violence.

GUATEMALA.

Report from Livingston, fruit port.

Acting Assistant Surgeon Peters reports as follows: Week ended April 8, 1905. Present officially estimated population, 3,500; no deaths; prevailing diseases, malarial; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 4	Olympia.....	41	20	0	0
6	Belize.....	17	5	0	0

The steamship *Olympia* cleared from Puerto Barrios.

HONDURAS.

Reports from Ceiba, fruit port.

Acting Assistant Surgeon Robertson reports as follows: Week ended April 8, 1905. Present officially estimated population about 4,000; 1 death. Prevailing diseases, malarial, mostly mild form; general sanitary condition of this port and the surrounding country during the week, good. Number of aliens sailing from this port during week, 2.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 1	Jos. Vaccaro.....	28	3	0	0
5	Bratten.....	16	0	0	0
7	Columbia.....	17	0	0	0
8	Gyller.....	15	0	0	0

Week ended April 15, 1905: One death; prevailing diseases, malarial, mostly mild type; general sanitary condition of this port and the surrounding country during the week, good. Number of aliens sailing from this port during week, 2.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 12	Jamaica	17	1	0	0
12	Harold	20	0	0	0
14	Jos. Vaccaro	29	5	0	0

Number of aliens sailing from this port during week, 2.

Report from Puerto Cortez, fruit port.

Acting Assistant Surgeon Carter reports as follows: Week ended April 7, 1905. Present officially estimated population, 4,000; one death; prevailing diseases, malarial fever of mild type and a few cases of grippe; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 1	Viator	17	0	0	0
4	Hiram	14	0	0	0
4	Columbia	17	0	0	0
6	Olympia	41	10	26	0
7	Espana	17	0	0	0

Number of aliens sailing during week, 1.

INDIA.

Report from Bombay—Mortality—Cholera, plague, and smallpox—Smallpox epidemic decreasing.

Acting Assistant Surgeon Hume reports, April 1, as follows:

Mortality.

	Week ended—	
	Mar. 21, 1905.	Mar. 28, 1905.
Plague deaths	648	652
Plague mortality per 1,000	43.42	43.69
Smallpox deaths	143	127
Cholera deaths	0	1
Total deaths	1,473	1,424
Total mortality per 1,000	98.70	93.42

A gradual diminution in the smallpox epidemic is noted.

Report from Calcutta—Inspection and fumigation of vessel—Cholera and plague mortality.

Acting Assistant Surgeon Eakins reports, March 30, as follows:

During the week ended March 25, 1905, bill of health was issued to the steamship *Bucrania* bound for Boston and New York with a total crew of 61. The usual precautions were taken, holds fumigated, rat guards placed on wharf lines, and Lascars' effects disinfected.

During the week ended March 25, 1905, there were 68 deaths from cholera and 510 deaths from plague in Calcutta.

In Bengal during the week ended March 18, 1905, there were 7,569 cases of and 7,219 deaths from plague. In India, during the week ended March 18, 1905, there were 47,602 cases and 42,088 deaths.

ITALY.

Reports from Naples—Inspection of vessels—Plague in Africa—Quarantine regulations—Typhus fever in Austria—Infectious diseases—Campaign against malaria—Emigration to the United States—Mohammedan pilgrimage.

Passed Assistant Surgeon Eager reports, April 3 and 10, as follows:

During the week ended April 1, 1905, the following ships were inspected at Naples and Palermo:

NAPLES.

Date.	Name of ship.	Destination.	Steerage passengers inspected and passed.	Pieces of large baggage inspected and passed.	Pieces of baggage disinfected.	Number of steerage passengers recommended for rejection.

PALERMO.

Mar. 31	Washington	New York	294	50	365	25
---------	------------------	----------------	-----	----	-----	----

EGYPT—PLAGUE.

During the week ended March 16, 1905, no fresh cases of plague were reported in Egypt. The precautionary measures applied to vessels leaving Egypt were discontinued March 12, 1905.

TURKEY—QUARANTINE REGULATIONS.

By decision of the sanitary board of Constantinople, dated March 14, 1905, the precautionary measures imposed on arrivals from Suez at Turkish ports are now restricted to medical inspection, disinfection,

and destruction of rats and mice. Vessels, however, carrying pilgrims are still subject to the measures prescribed February 22, 1905.

DUTCH EAST INDIES—QUARANTINE REGULATIONS.

By decree, dated February 17, 1905, the port of Portandar, India, is declared to be free from plague.

BRITISH EAST AFRICA—PLAGUE.

Up to February 11, 1905, there were reported 25 fatal cases of plague in British East Africa. Owing to the prevalence of the disease in the Uganda territory the following precautionary measures have been adopted by the authorities at Nairobi:

The corpses of persons dead from infectious diseases are to be dealt with according to the instructions of the health officer. In places where infectious diseases are prevalent the health officers are given power to enter dwellings for the purpose of medical inspection. Cleansing, ventilation, and disinfection of dwellings may also be ordered. In infected places arrangements are to be made for the accommodation of patients and for the detention of persons to be held under observation.

Any person intending to leave the infected area is required to undergo disinfection and quarantine as prescribed by the health officer. A sanitary passport is delivered to all persons leaving the infected area.

BRITISH INDIA—QUARANTINE REGULATIONS.

The quarantine regulations imposed at the ports of Orissa and Chittagong on arrivals from Singapore and Portandar were repealed February 15, 1905.

TYPHUS FEVER—AUSTRIA.

In the province of Gallizia, from January 1 to February 11, 1905, 269 cases of typhus fever were reported. In Bohemia, during the same period, 33 cases were reported.

LUXEMBURG—INFECTIOUS DISEASES.

From February 16 to 28, 1905, 39 cases of infectious diseases were reported in Luxemburg, namely, enteric fever, 6 cases; diphtheria, 6; whooping cough, 3; scarlatina, 23; and puerperal fever, 1.

MORTALITY IN ITALIAN CITIES.

Naples.—Estimated population to December 31, 1904, 577,518. During the year 1904, a total number of 14,491 deaths were reported, including smallpox 2, measles 60, scarlatina 5, enteric fever 74, typhus fever 5, diphtheria 110, whooping cough 7, and pulmonary tuberculosis 971. Annual rate, 23.71 per mille.

Month of January, 1905. Estimated population, 578,520. Total number of deaths, 1,831; including measles 3, enteric fever 1, diphtheria 9, and pulmonary tuberculosis 98. Annual rate, 36.2 per mille.

Florence.—Month of December, 1904. Estimated population, 216,736. Total number of deaths, 445; including measles 4, whooping cough 1, puerperal fever 1, diphtheria 13, erysipelas 4, enteric fever 5, and pulmonary tuberculosis 53. Annual rate, 24.64 per mille.

ITALY—INFECTIOUS DISEASES.

For the week ended March 30, 1905, the following reports of infectious diseases in Italy were officially registered:

Smallpox.—There were reported 4 cases in two communes in the province of Lecce: 3 cases at Alcamo, Trapani; 10 cases at Castelmezzano, Potenza; 15 cases at Palermo, and 2 cases at Bagheria (Palermo). Some cases were also reported at Caltagirone, Assaro, Belpasso, Fiumefreddo and Catenanuova in the province of Catania, and 20 cases at Catania.

Measles.—The malady is still epidemic in the province of Beluno.

Enteric fever.—Very few cases are reported.

Diphtheria.—Twenty-six cases were reported at Milan and several cases at Rome, Foligno (Perugia), and at Clusone (Bergamo). There are many cases in the province of Arezzo.

Pellagra.—The disease is still prevailing in the province of Perugia.

THE RED CROSS CAMPAIGN AGAINST MALARIA.

The antimalarial campaign was conducted by the Italian Red Cross Society in the Roman Campagna for five months in the year 1904. During this period prophylactic treatment was administered to 12,061 individuals, 181 kilograms of quinine in tabloid form being consumed. Among the persons treated there were 800 cases of malarial fever, giving a proportion of about 67 per mille. Considering the fact that among the fever stricken, 660 persons, already febrile from infection contracted in June or early in July, entered the seven zones where the work is being done from other sections and that others did not follow out the treatment with regularity, an estimate is made that only 140 persons contracted malarial infection notwithstanding thorough prophylactic treatment with quinine. In all seven zones there were, during the five months, 448 cases of disease not of a malarial nature, gastro-intestinal catarrh predominating as in previous seasons.

EMIGRATION FROM NAPLES TO THE UNITED STATES.

The period of maximum emigration from southern Italy to the United States is now at hand. During the month of March 29 steamships left Naples for New York and Boston, and 31,581 emigrants were inspected preliminary to granting the bill of health. As a result of the inspection the rejection of 407 aliens was recommended. Twenty-nine sailings are registered for April and it is expected that large numbers of southern Italians will continue to emigrate until late in June.

During the week ended April 8, 1905, the following ships were inspected at Naples, Messina, and Palermo:

EGYPT—PLAGUE.

No fresh cases of plague occurred in Egypt during the week ended March 23, 1905.

EGYPT—QUARANTINE REGULATIONS.

By decision of the permanent committee of the international sanitary board, dated March 21, 1905, plague quarantine regulations were put in force against arrivals from Bavnagar, India.

MOHAMMEDAN PILGRIMAGE.

During the Mohammedan pilgrimage, 1904-5, a total number of 67,083 pilgrims landed in the Hedjaz. Of these, 39,509 came from the north and 27,574 from the south. The envoy of the sanitary board of Alexandria at Hedjaz reports, March 7, 1905, that during the month of December, 1904, and January and February, 1905, a total number of 1,331 deaths occurred among the pilgrims and the population of Mecca. The causes of death included dysentery, 124; enteric fever, 25; smallpox, 28; measles, 26; puerperal fever, 13; leprosy, 1, and pulmonary tuberculosis, 92.

The report says:

The general sanitary condition at Mecca has to the present time been satisfactory, and is still so at Djeddah, although the measures taken leave much to be desired. The favorable weather has in particular hindered the propagation of dysentery. The crowding of pilgrims at Mecca caused an outbreak of dysentery during the last five days of February in an epidemic form, in which the mortality reached the number of 40 a day. Exposure to the sun and, at night, to the chilling air was the predisposing cause, accentuated by the formal refusal to allow the pilgrims to depart. Nevertheless, the state of public health has improved this week, due to the departure of the pilgrims from Mecca and also the departure of those embarked from Djeddah for Tor. Smallpox has been present at Mecca among the neighboring Bedouins for

more than five months. It was combatted with energy and has diminished greatly; nevertheless, smallpox patients are met, in the different stages of the disease, wandering about the streets regardless of their condition. A lookout is kept for such cases by the sanitary officers at Djeddah and Mecca.

SMALLPOX IN TURKEY.

During the early part of March, 1905, 8 cases, with 2 deaths, of smallpox were reported in the Turkish village of Kruta, near the Montenegro frontier. All communication with the infected place was prohibited by the Government of Montenegro. A physician was sent to the infected district by the Turkish authorities, and all necessary action was taken.

STRAITS SETTLEMENTS—QUARANTINE REGULATIONS.

According to a notification dated February 25, 1905, the plague quarantine regulations imposed in the Straits Settlements on arrivals from Bangkok, Siam, were repealed.

DUTCH EAST INDIES—QUARANTINE REGULATIONS.

By decree promulgated in the Dutch East Indies, dated February 25, 1905, Persia was declared to be free from cholera.

CYPRUS—QUARANTINE REGULATIONS.

In Cyprus, plague quarantine regulations against arrivals from Egypt were repealed March 17, 1905. March 20 the regulations against arrivals from Smyrna were also repealed.

TURKEY—QUARANTINE REGULATIONS.

By decision of the sanitary board of Constantinople, dated March 22, 1905, arrivals from Suez are now subjected at Turkish ports to medical inspection only. The quarantine regulations, however, imposed on vessels carrying pilgrims are still in force.

MORTALITY IN EUROPEAN CITIES.

Berne.—Month of November, 1904: Estimated population, 68,958. Total number of deaths, 74, including measles 2, and pulmonary tuberculosis 8. Annual rate, 13.1 per mille.

Geneva.—Month of November, 1904: Estimated population, 110,954. Total number of deaths, 144, including scarlatina 1, diphtheria 1, enteric fever 1, and pulmonary tuberculosis 31. Annual rate, 15.8 per mille.

Athens.—Month of December, 1904: Estimated population, 122,053. Total number of deaths, 327, including scarlatina 3, diphtheria 2, enteric fever 5, and pulmonary tuberculosis 44. Annual rate, 32.1 per mille.

Berlin.—Month of January, 1905. Estimated population, 1,999,194. Total number of deaths, 3,065, including scarlatina 31, measles 45, diphtheria 32, whooping cough 2, enteric fever 4, puerperal fever 11, and pulmonary tuberculosis 462. Annual rate, 18.4 per mille.

Munich.—Month of January, 1905. Estimated population, 579,384. Total number of deaths, 1,027, including scarlatina 7, measles 11, diph-

theria 7, whooping cough 8, puerperal fever 3, and pulmonary tuberculosis 163. Annual rate, 21.3 per mille.

Hamburg.—Month of January, 1905. Estimated population, 776,354. Total number of deaths, 1,190, including scarlatina 5, measles 9, diphtheria 15, whooping cough 10, enteric fever 1, puerperal fever 8, and pulmonary tuberculosis 155. Annual rate, 18.4 per mille.

ITALY—INFECTIOUS DISEASES.

The number of cases of infectious diseases in Italy for the month of December, 1904, was as follows: Measles, 12,327; scarlatina, 1,219; smallpox, 941; enteric fever, 2,455; diphtheria, 2,170; puerperal fever, 259; pulmonary tuberculosis, 468; malarial diseases, 8,574; pellagra, 335; hydrophobia, 5; anthrax, 185, and glanders, 2.

For the week ended April 6, 1905, the following reports were officially registered:

Smallpox.—There were reported 2 cases in the Province of Lecce, 9 cases at Palermo, 4 cases at Augusta, and 4 at Melilli in the Province of Syracuse. Cases were reported, too, at Como, Besenzone (Piacenza), Castelmezzano, and Matera (Potenza).

Measles.—The disease is epidemic in the communes of Mesagne (Lecce) and Corio (Turin).

Pellagra.—The disease is still prevailing in the Province of Perugia.

JAPAN.

Report from Yokohama—Inspection of vessels—Plague-infected rats in Tokyo—Communicable diseases.

Passed Assistant Surgeon Moore reports, March 25 and 30, as follows:

During the week ended March 18, 1905, 3 steamships having an aggregate personnel of 339 crew and 117 passengers were inspected prior to issuance of bills of health.

Since my last report on several occasions additional plague-infected rats have been discovered in Tokyo (Fukagawa Ku). Personal observation shows that the infected district is inclosed by a fence of galvanized sheets, 3 feet or more in height, in such a manner as to practically preclude the possibility of the exit of infected rats, pending the disinfection of the isolated buildings and their contents. Otherwise sanitary conditions in Japan, from the standpoint of quarantine, are unchanged.

During the week ended March 25, 1905, bills of health were issued to 4 steamships having an aggregate personnel of 498 crew and 1,248 passengers; 687 steerage passengers were bathed and their body clothing was disinfected; 1,146 intending immigrants were examined with reference to their freedom from any loathsome or contagious disease barring them under the United States immigration laws.

Reports of communicable diseases in Yokohama have been received at the consulate-general, as follows: For the week ended March 12, 1905: Enteric fever, 2 cases, 1 death; diphtheria, 5 cases, 1 death. For the week ended March 19: Enteric fever, 4 cases, no deaths; diphtheria, 5 cases, 1 death. For the week ended March 26: Diphtheria, 6 cases, 1 death.

MEXICO.

Report from Progreso—Sanitary conditions—Inspection and fumigation of vessels.

Acting Assistant Surgeon Harrison reports, April 14, as follows:

Two weeks ended April 14, 1905. Quarantinable diseases, none; deaths from other causes could not be learned.

Vessels cleared: April 5, *Telefon* (fumigated), Mobile, crew 20. April 6, *Galveston* (fumigated), Texas City, crew 24; passengers, transit, 2, Progreso 8; *Tjomo*, New York, via Campeche, crew 17. April 8, *Westphalia* (fumigated), New Orleans, crew 34. April 9, *Havana*, New York, via Habana, crew 90; passengers, Progreso 63. April 11, *Alm* (fumigated), Mobile, crew 22. April 12, *Saphir* (fumigated), Texas City, crew 17. April 14, *Cronshagen* (fumigated), New Orleans, crew 21. April 8, schooner *Marion* (fumigated), Ship Island, crew 7.

Reports from Tampico—Inspection and fumigation of vessels—Mortality.

Acting Assistant Surgeon Frick reports, April 14, 15, and 17, as follows:

Period from March 27 to April 1, 1905, inclusive. March 29: Inspected and passed British steamship *August Belmont*, with 41 in crew, bound for Pensacola, in ballast. Inspected and passed American steamship *Seneca*, with 59 in crew, 3 first-class and 94 third-class passengers, bound for New York via Habana and Nassau, in general cargo and cattle for Cuba. The *Seneca* was fumigated by the Cuban medical officer prior to her departure from here. March 30, 1905: Inspected and passed Norwegian steamship *Peter Jibson*, with 28 in crew, bound for Pensacola via Daiquiri, in ballast. The *Jibson* was fumigated by the Cuban medical officer prior to departure from this port.

Week ended April 8, 1905: April 2, 1905, inspected and passed the Norwegian steamship *Norheim*, with 18 in crew and 11 passengers, bound for New Orleans via Veracruz, in general cargo. April 2, fumigated and passed the Norwegian steamship *Dagfin*, with 20 in crew, bound for Port Arthur in ballast. April 5, British steamship *Asian*, with 52 in crew, 22 first-class and 8 third-class passengers bound for New Orleans via Veracruz, in general cargo. April 6, inspected and passed Norwegian steamship *Tancred*, with 25 in crew, bound for New York, in cargo of ore. April 6, inspected and passed American steamship *Santiago*, with 57 in crew, 11 first-class and 2 third-class passengers, bound for New York via Habana, in general cargo and cattle for Cuba. The *Santiago* was fumigated by Cuban medical officers prior to departure. April 7, fumigated and passed the Norwegian steamship *Malm*, with 20 in crew and 3 first-class passengers, bound for Port Arthur in ballast. April 8, fumigated and passed British steamship *E. O. Saltmarsh*, with 35 in crew, bound for Pensacola in ballast. April 7, inspected and passed the Norwegian steamship *Hermod*, with 26 in crew, bound for Baltimore via Daiquiri. The *Hermod* was fumigated by the Cuban medical officer at this port prior to her departure.

Recapitulation.—Inspected and passed, steamships, 5; crews, 253; passengers, 68. Fumigated and passed, steamships 3.

The Cuban medical officer fumigated 2 of the first mentioned 5 steamships because of their being bound via Cuban ports. No quarantinable diseases were reported.

Week ended April 15, 1905: Inspected and passed British steamship *Irisbrook*, April 10, 1905, bound for a point north of Cape Hatteras, with 24 in crew. Vessel sails in ballast and was fumigated by the Cuban medical officer prior to departure, as she is bound via Cardenas. April 11, inspected and passed British steamship *Barnton*, bound for New York, via Progreso, with 23 in crew. Vessel sails in ballast. April 12, inspected and passed British steamship *Matador*, bound for Galveston via Veracruz, with 35 in crew and 3 passengers. Vessel sails in general cargo. April 13, fumigated and passed British steamship *August Belmont*, with 45 in crew. Vessel sails in ballast for Pensacola. April 13, inspected and passed American steamship *Matanzas*, bound for New York via Cuba, with 41 in crew and 7 passengers. Vessel sails in general cargo and with cattle for Habana; fumigated by the Cuban medical officer. April 15, fumigated and passed Norwegian steamship *Dayin*, bound for Port Arthur, with 20 in crew. Vessel sails in ballast. April 15, inspected and passed British steamship *Thurland Castle*, bound for Mobile via Mexican ports, with 30 in crew. Vessel sails in general cargo.

Recapitulation.—Inspected: Steamships, 5; personnel (crew), 218; passengers, 10. Fumigated and passed steamships, 2.

Of the 3 steamships inspected 2 were fumigated by the Cuban medical officer at this port.

No quarantinable disease was reported during the past week.

Mortality.—Week ended April 15, 1905: Pneumonia, 4; alcoholism, 1; tuberculosis, 3; unknown, 1; chlorosis, 1; congenital debility, 2; gangrene, erysipelas, 1; diarrhea, 2; enteritis, 1; entero-colitis, 1. Total number of deaths, 17. Estimated population, 20,000. Mortality rate on this basis, 41.60. Diseases prevailing at this port at present are pneumonia, tuberculosis, and intestinal diseases.

Report from Veracruz—No quarantinable disease reported during current year.

Passed Assistant Surgeon Wilson reports, April 13, as follows:

No quarantinable disease has been reported this year. The climatic conditions are similar to those of last week, except that the temperature is gradually becoming higher.

NICARAGUA.

Report from Bluefields, fruit port.

Acting Assistant Surgeon Layton reports as follows: Six days ended April 14, 1905. Present officially estimated population, 3,500; 1 death. Prevailing diseases, malarial fever and tuberculosis; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.
Apr. 10	Canada	8	0	0	0
12	Utstein	16	1	0	0
14	Imperator	18	6	0	0

NORFOLK ISLAND.

Mortality and health conditions during year 1904—Increase of tubercular diseases.

Consular Agent Robinson reports, March 1, as follows:

During the year 1904 the general health of the island was good. There was a slight epidemic of dysentery at the Melanesian Mission at the beginning of the year, and also of influenza on the island.

Tubercular diseases, especially of the lungs, are unfortunately becoming more prevalent. The deaths were 12 in number, and of these 7 were caused by pulmonary phthisis.

Population: The population of the island on December 31, 1904, was 1,034.

Meteorological conditions: The temperature ranged from 75° in February to 54° in August, the highest and lowest. Rain fell on 154 days, gauging 53.45 inches. Winds were easterly 180 days, westerly 186 days.

PANAMA.

Reports from Colon—Inspection of vessels—Passenger traffic on fruit vessels—Mortality—Quarantine against Colon imposed by Jamaica and Costa Rica.

Acting Assistant Surgeon Mohr reports, April 10 and 12, as follows:

During the week ended April 8, 1905, the following vessels cleared for ports in the United States and were granted bills of health:

British steamship *Mantinea*, for a port in the United States via Santiago, Cuba, April 2, with 23 crew and no passengers.

American steamship *Seguranca*, for New York, April 5, with 70 crew and 135 passengers.

Norwegian steamship *Preston*, for New Orleans via Bocas del Toro, April 6, with 35 crew and 30 passengers.

British steamship *Texan*, for Galveston via Jamaica and Mexican ports, with 45 crew and no passengers.

American steamship *City of Washington*, for New York, April 8, with 61 crew and 18 passengers.

The living quarters of the British steamship *Mantinea*, bound for Santiago, Cuba, were fumigated prior to sailing from this port by the quarantine officer of Colon.

The steamers of the United Fruit Company, plying between this port and New Orleans via Bocas del Toro, are, with the consent of the Louisiana State board of health, taking passengers from this port since the close season began. These vessels discharge cargo here and then

proceed to Bocas for their cargo of fruit, at which port they are fumigated by the representative of the Louisiana board. These vessels also carry a medical inspector to represent the same board. This passenger traffic consists chiefly of Americans and other foreigners, many of them canal employees returning to the United States. Most of them are nonimmunes, and have been but a short time on the Isthmus. All are personally inspected by me and temperatures taken before they go on board the ship. The time consumed by the voyage to New Orleans is 7 to 8 days, 1½ to 2 days being spent in Bocas taking on fruit.

Jamaica and Costa Rica have quarantined against Colon, not admitting vessels having passengers on board.

During the week ended April 10, 1905, the following deaths were officially reported: Syphilis, 1; spinal disease, 1; bilious fever, 1; diarrhea, 1; lumbricoids, 1; dropsy, 3; total, 8.

The case of bilious fever occurred in a child aged 2 years; the cases of dropsy among children aged, respectively, 2 months, 3 months, and 17 years.

No cases of yellow fever have been reported in Colon since the 6th instant, and in Panama none have been reported since March 27. The fumigation of houses in Colon is proceeding systematically and the worst portion of the town has been well gone over.

Report from Bocas del Toro, fruit port.

Acting Assistant Surgeon Osterhout reports as follows: Week ended April 7, 1905. Present officially estimated population not obtainable; no deaths; prevailing diseases, malarial fevers; general sanitary condition of this port and the surrounding country during the week, good.

Bills of health were issued to the following-named vessels:

Date.	Vessel.	Destination.	Number of crew.	Number of passengers from this port.	Number of passengers in transit.	Pieces of baggage disinfected.

PERU.

Reports from Callao—Plague situation in Peru and Chile—Smallpox in Chilean ports—Vaccination of crew on steamship Tucapel at Valparaiso—Indorsements on bills of health of steamship Limari.

Assistant Surgeon Lloyd reports, March 20 and 31, as follows:

Since February 11 I have received no official reports from the health officer concerning the plague situation in Peru. Cases continue to occur in places previously reported as infected. Twelve cases and 2 deaths are reported in Mollendo during the past 2 weeks, and 8 cases with 4 deaths in Lima during the same period. In Pisagua, 150 cases with many deaths are reported, with very little being done to check the spread of the disease, and a large exodus of people fleeing to escape the fate of those less fortunate. Three cases and 2 deaths are reported

in Arica, and the disease has been reported as having appeared in Arequipa. Smallpox is epidemic in many Chilean ports, with a reported scarcity of vaccine that can be relied upon. Of 35 members of the crew of the steamship *Tucapel*, who were vaccinated in Valparaiso on embarking (about 10 days ago), only 1 positive result was obtained.

Week ended March 26, 1905.

PLAGUE.

	New cases.	Died.	Recovered.	Remaining.
Chilayo.....	12	9	2	25

The lazaretto at Guadalupe was closed on the 24th.

Indorsements on bills of health of steamship Limari.

Bills of health of the steamship *Limari*, arrived this morning (April 1), bear the following indorsements:

Valparaiso.—"Smallpox prevalent and some deaths have occurred; no definite statistics available." No mention is made of the presence or absence of other infectious diseases.

Iquique.—Number of cases of plague unknown. "Suspected infectious disease at this port. At Pisagua there is a serious outbreak of bubonic plague and other suspected cases of infectious disease causing many deaths."

Arica.—"Number of cases of plague in past two weeks, 10; deaths, 4. A large number of persons from the infected port of Pisagua have arrived at this port within the past month."

PHILIPPINE ISLANDS.

Report from Manila—Quarantinable diseases—Inspection of vessels.

Chief Quarantine Officer Heiser reports, March 15, as follows:

During the week ended March 11, 1905, the following quarantinable diseases were reported in the city of Manila: Smallpox, 1 case, no deaths; plague, 2 cases, 3 deaths.

The following-named vessel cleared for the United States during the week:

On March 11, 1905, the American steamer *Minnesota* was granted a bill of health for the port of Seattle, Wash., via Hongkong, Shanghai, Nagasaki, Kobe, and Yokohama. The persons on board were inspected at the hour of sailing.

TURKEY.

Return of the pilgrimage of the Hedgaz—Arrivals and departures of vessels at quarantine station of Tor.

[From the Bulletin Quarantenaire, Alexandria, April 6, 1905.]

VESSELS ARRIVED FROM YAMBO AND TOR.

March 30, 1905.—French steamship *Savoie* with 1,151 Algerine and Moroccan pilgrims; destination, Algiers and Tangier; 1 death during the voyage.

British steamship *Assouan* with 1,407 Egyptian pilgrims; 2 sick during the voyage.

French steamship *America* with 1,250 Algerine, Tunisian, and Moroccan pilgrims; destination, Algiers and Tangier; 1 death and 2 sick during the voyage.

Ottoman steamship *Angora* with 687 Ottoman pilgrims; destination, Beirut, Smyrna, and Constantinople.

March 31, 1905.—British steamship *Minieh* with 1,447 Egyptian pilgrims.

April 1, 1905.—Italian steamship *Tirreno* with 1,453 pilgrims; destination, Tunis; 7 deaths during the voyage.

April 1, 1905.—British steamship *Mariout* with 841 Egyptian pilgrims; 2 deaths during the voyage.

April 1, 1905.—British steamship *Neguleh* with 519 Egyptian pilgrims.

April 3, 1905.—British steamship *Mengaleh* with 924 Egyptian pilgrims; 2 sick during the voyage.

VESSELS CLEARED FROM TOR.

April 1, 1905.—*Troucor*; destination Theodosia, with 681 Russians.

April 2, 1905.—*Savoie, America, Angora, and Tirreno.*

On their arrival at Suez these vessels were permitted to pass the canal in quarantine after favorable medical visit.

WEST INDIES.

Reports from Barbados—Inspection and fumigation of vessels—Examination of laborers for work on the Panama Canal—Smallpox reported present in Grenada—Vaccination of emigrants for the Canal Zone.

Assistant Surgeon Ward reports, April 7, 11, and 13, as follows:

During the week ended April 1, 1905, bills of health were issued to 9 steamships and 2 sailing vessels, with 339 crew, 60 cabin, 28 steerage, and 56 deck passengers. Of this number I inspected 6 steamships, 1 sailing vessel, 238 crew, 24 cabin, 28 steerage, and 56 deck passengers, of whom 2 crew, 23 cabin, 21 steerage, and 44 deck passengers were taken on at this port. Three persons wishing third-class passages for the United States were recommended for rejection on account of suffering from recurring diseases.

On March 27 I fumigated and issued a certificate to the British steamship *Rockabill*, from Para, bound to Port Tampa, Fla., in water ballast, with 22 crew, all well; no passengers. Two rain-water casks were oiled to kill mosquito larvæ of the genus *Culex*.

The same day I viséed the bill of health of the Republic of Panama, issued to the Royal Mail steamship *La Plata*, bound to Colon via ports on the Caribbean Sea, with 145 crew, 24 laborers, and passengers. There were 16 certificates of vaccination issued to deck passengers for Colon and 95 to laborers recruited for work on the Panama Canal.

For the two weeks ended April 1 I examined 121 men to ascertain their fitness to act as laborers for work on the Panama Canal and rejected 29.

On the afternoon of March 27 I issued a sanitary certificate to the intercolonial steamship *Eden*, of the Royal Mail, bound to San Juan, P. R., via the Northern Islands, with 74 crew, 19 cabin, and 56 deck passengers. The 13 cabin passengers from La Guaira, bound to Porto Rico, were transshipped at this port to the steamship *Eden*. I issued certificates of good health to these passengers.

From a letter dated March 29 I learn that the Danish West Indies have established a quarantine of fifteen days against Grenada and the Grenadines owing to the prevalence of smallpox in a parish in Grenada 14 miles from the principal town, St. George.

The quarantine authorities of this port have not been advised of any additional cases of smallpox in Grenada since the 23d ultimo, the date of the last report. I have learned, however, from reliable sources that another case occurred on March 24.

The general health of the island of Barbados continues good. No quarantinable diseases have been reported.

During the week ended April 8, 1905, bills of health were issued to 8 steamships and 4 sailing vessels, with 396 crew, 62 cabin and 53 steerage passengers. Of this number I inspected 5 steamships, 2 sailing vessels, 223 crew, 26 cabin and 53 steerage passengers, of whom 6 crew, 15 cabin and 13 steerage passengers were taken on at this port.

On April 3 I fumigated all the compartments, including the holds, of the British steamship *Justin*, from Para in water ballast, with 41 crew and 4 cabin passengers, bound to Galveston, Tex. While lighting the sulphur in pots in No. 4 hold one of the crew fell from the lower between decks to the lower hold, a distance of 15 feet. His fall was broken by the tunnel, so that his injuries, although painful, were not serious. He was removed to the Pelican Island quarantine station.

The same day I fumigated all the compartments, including the holds, with the exception of No. 3 and the forward part of No. 2, which is separated from the after part by a wooden bulkhead, because both holds were filled with coffee. This vessel called at this port from Santos, via Rio de Janeiro and Victoria, with a cargo of coffee and 34 crew for New Orleans.

The quarantine authorities of this port have received a dispatch from Grenada, dated April 6, which says that since the 23d ultimo 3 cases of smallpox have occurred in the infected district, one at Paradise Estate, a boy, with no apparent connection with previous cases; the second, a child, at Mount Horne, a contact with a previous case, and the third, also a child, at a school where several other cases originated. All 3 cases are mild, and the last case occurred yesterday (April 5).

The general health of Barbados is good; no quarantinable diseases have been reported.

Statement of certificates of vaccination of emigrants for the canal zone issued during the month of March, 1905.

Date.	Vessel.	Number vaccinated.	Number recently successfully vaccinated.	Total for steamship.	Total for month.

FOREIGN AND INSULAR STATISTICAL REPORTS OF COUNTRIES AND CITIES—YEARLY AND MONTHLY.

AFRICA—Sierra Leone.—Two weeks ended March 17, 1905. Estimated population, 50,000. Total number of deaths, 51. No deaths from contagious diseases. One smallpox death occurred during week ended March 3, 1905.

ARGENTINA—Buenos Ayres.—Month of January, 1905. Estimated population, 982,261. Total number of deaths, 1,246, including diphtheria 3, enteric fever 10, measles 1, smallpox 28, and 186 from tuberculosis.

AUSTRALIA—New South Wales—New Castle.—Month of February, 1905. Estimated population, 50,670. Total number of deaths, 42, including diphtheria 1, enteric fever 2, and 2 from tuberculosis.

SYDNEY.—Month of February, 1905. Population, 518,570. Total number of deaths, 415, including diphtheria 2, enteric fever 5, measles 1, and 35 from tuberculosis.

BAHAMAS—Dunmore Town.—Two weeks ended March 31, 1905. Estimated population, 1,232. No deaths and no contagious diseases.

Governors Harbor.—Week ended April 1, 1905. Estimated population, 1,500. No deaths and no contagious diseases.

Green Turtle Cay, Abaco.—Two weeks ended March 31, 1905. Estimated population, 3,314. No deaths and no contagious diseases reported.

Nassau.—Three weeks ended April 1, 1905. Estimated population, 12,650. No deaths and no contagious diseases reported.

BRAZIL—Pernambuco.—Two weeks ended February 28, 1905. Estimated population, 200,000. Total number of deaths, 332, including enteric fever 1, measles 1, smallpox 153, and 35 from tuberculosis.

Two weeks ended March 15, 1905. Total number of deaths, 374, including enteric fever 4, measles 1, smallpox 181, and 39 from tuberculosis.

CANADA—Quebec—Sherbrooke.—Month of March, 1905. Estimated population, 13,000. Total number of deaths, 24, including diphtheria 1, and 1 from enteric fever.

CUBA—Habana.—Month of March, 1905. Estimated population, 275,000. Total number of deaths, 466, including diphtheria 1, enteric fever 1, scarlet fever 1, leprosy 1, and 111 from tuberculosis.

FRANCE—*Nantes*.—Three weeks ended April 8, 1905. Estimated population, 130,000. Total number of deaths not reported. Eight deaths from smallpox reported.

Roubaix.—Month of March, 1905. Estimated population, 124,660. Total number of deaths, 128, including diphtheria 1, enteric fever 1, measles 1, scarlet fever 3, and 3 from whooping cough.

GERMANY—*Strasburg*.—Month of February, 1905. Estimated population, 165,187. Total number of deaths, 286, including diphtheria 7, enteric fever 1, scarlet fever 3, whooping cough 4, and 42 from tuberculosis.

GIBRALTAR.—Two weeks ended April 2, 1905. Estimated population, 27,460. Total number of deaths, 31, including 7 from measles.

GREAT BRITAIN—*England and Wales*.—The deaths registered in 76 great towns in England and Wales during the week ended April 1, 1905, correspond to an annual rate of 15.7 per 1,000 of the aggregate population, which is estimated at 15,609,377.

London.—One thousand three hundred and fifty-seven deaths were registered during the week, including measles 29, scarlet fever 4, diphtheria 8, whooping cough 40, enteric fever 4, and 11 from diarrhea. The deaths from all causes correspond to an annual rate of 15.1 per 1,000. In Greater London 1,925 deaths were registered. In the "outer ring" the deaths included 6 from diphtheria, 4 from measles, 1 from scarlet fever, 9 from whooping cough, and 3 from diarrhea.

Ireland.—The average annual death rate represented by the deaths registered during the week ended April 1, 1905, in the 21 principal town districts of Ireland was 24.3 per 1,000 of the population, which is estimated at 1,093,959. The lowest rate was recorded in Armagh, viz, 6.9, and the highest in Tralee, viz, 58.1, per 1,000. In Dublin and suburbs 192 deaths were registered, including diphtheria 1, enteric fever 1, measles 4, scarlet fever 1, diarrhea 2, and 58 from tuberculosis.

Scotland.—The deaths registered in 8 principal towns during the week ended April 1, 1905, correspond to an annual rate of 16.9 per 1,000 of the population, which is estimated at 1,749,917. The lowest rate of mortality was recorded in Perth, viz, 10.7, and the highest in Greenock, viz, 18.6, per 1,000. The aggregate number of deaths registered from all causes was 568, including diphtheria 5, measles 5, scarlet fever 1, and 20 from whooping cough.

HAWAII—*Honolulu*.—Month of March, 1905. Census population, 39,306. Total number of deaths, 78, including enteric fever 1 and 12 from tuberculosis.

JAMAICA—*Kingston*.—Month of March, 1905. Estimated population, 52,475. Total number of deaths, 165, including 17 from phthisis pulmonalis.

SPAIN—*Barcelona*.—Ten days ended March 31, 1905. Estimated population, 600,000. Total number of deaths, 542, including enteric

fever 2, measles 12, scarlet fever 2, whooping cough 1, smallpox 7, and 42 from tuberculosis.

Corunna.—Month of March, 1905. Estimated population, 50,000. Total number of deaths, 110, including enteric fever 1, and 24 from tuberculosis.

SWITZERLAND.—Reports for the 2 weeks ended March 25, 1905, from the largest cities and towns, having an estimated population of 827,000, show a total of 621 deaths, including diphtheria 9, measles 17, scarlet fever 6, whooping cough 11, and 91 from phthisis pulmonalis.

WEST INDIES—*St. Thomas*.—Year ended December 31, 1904. Estimated population, 11,012. Total number of deaths, 347, including diphtheria 5, enteric fever 4, and 38 from tuberculosis.

Cholera, yellow fever, plague, and smallpox, December 31, 1904, to April 28, 1905.

[Reports received by the Surgeon-General, Public Health and Marine-Hospital Service, from American consuls through the Department of State, and from other sources.]

[For reports received from June 25 to December 30, 1904, see PUBLIC HEALTH REPORTS for December 30, 1904.]

[NOTE.—In accordance with custom, the tables of epidemic diseases are terminated semiannually and new tables begun.]
